This letter is in regards to the Von Borgens septic dumping site,

The Von Borgens have supplied a dump site for glen county resident for 50 years, not charging the county or septic Company's any fee for 48 of those years.

This dump site is clean and professionally run, last year when this dump site was closed the price for pumping a septic tank went from 300.00 dallors to 450.00 dallors over nite.

Residents of glen county can not afford this price increase with only one dump site this creates a monopoly for the septic copany that owns the remaining dump site

Please take this into consideration. I am a twenty five year Glen Co resident.
