

Errata to Item Number 9

January 18, 2007

Item Number 9: Consideration of an order granting petition for reconsideration of Water Quality Certification of the Pit 3, 4, and 5 Hydroelectric Project, Federal Energy Regulatory Commission Project Number 233, Pacific Gas and Electric Company

There are two late revisions to this item:

1. The title at the top of the draft order should refer to Order **WQ** followed by the number to be assigned to the order. The draft mistakenly referred to Order **WR**, which would be used for the title of a water right order.
2. The first sentence in water quality certification Condition 11 in the package states "Where facility modification is required to meet the Minimum Stream Flows or Reservoir Level and Ramping Rate conditions, modifications must be completed within three years of the issuance of the license." The sentence should state "Where facility modification is required to meet the Minimum Stream Flows or ~~Reservoir Level and Ramping Rate~~ conditions, modifications must be completed within three years of the issuance of the license."
