

4/4/05

To Jeffrey Young, Water Board Members and Staff

We are members of the silent majority who elected and support the present Los Osos C.S.D.

We have been hearing lies and insinuations from the people of the so called "tax payer's watch" which have been so terribly detrimental to the town of Los Osos, that we can no longer stand by and let these people ruin our community.

Where was the taxpayer's watch when the sewer bill was going to be over \$200.00 per month? Where were they when the old board was spending nearly all of our \$20 million dollar bond money and starting the project and making contracts that they knew were unjustified, only 20 days before the election? This group is such a farce. They are so vindictive that they will do or say anything to get the CSD dissolved. That is their only objective. They have said so themselves.

The present board members are sincere, hard working people who are doing their utmost to build a wastewater treatment that will be affordable, and do the job that the in-town site would not have accomplished. That is exactly what we elected them to do.

Please, we beg of you. Give this CSD a chance to show you how they can build a better waste water project. We all want this problem resolved as soon as possible.

Imagine how quickly they could build a project if everyone cooperates and if you folks give them the chance to prove that they have a good solution to the problem.

We are seniors and will not be here for long, but we want the right project for our community and for the residents of the future. Please help us. Think of how this would affect you in your neighborhood. It is ruining so many lives. I don't believe that this is your goal, but sometimes it sure seems like it is. We hope and pray that you will start anew with this board so that we can all work together and build a super system.

Sincerely,

Mr. and Mrs. Duncan McQueen
