Mr. Raymond Gray
12820 Sycamore Avenue
San Martin, CA 95046

Dear Mr. Gray:

SITE CLEANUP PROGRAM: ANALYTICAL TEST RESULTS FOR WELL 10S03E12B003

Per your request, we have attached a copy of the analytical laboratory reports from samples that Olin collected from your well from the third quarter of 2005 until present. Ms. Thea Tryon, of our staff, also spoke with representatives from Olin regarding the non-detect (ND) sample results reported for the second and third quarter of 2006. According to Olin, your well has an ion-exchange treatment system installed, which is designed to remove perchlorate to non-detect (below detectable) levels. In order to ensure proper operation, water samples are taken and analyzed prior to, in the middle of, and after the water has been treated by the ion-exchange system. It appears that the ND results are representative of the perchlorate detections after the water was treated whereas the other sample results represent the perchlorate detections before the water entered the treatment system.

If you have additional questions please contact **Ms. Thea Tryon at (805) 542-4776.**

Sincerely,

Roger Briggs
Executive Officer
