NOTICE OF PUBLIC HEARING

concerning

TENTATIVE WASTE DISCHARGE REQUIREMENTS
FOR
IT ENVIRONMENTAL LIQUIDATING TRUST
MONTEZUMA HILLS FACILITY
OPERATION OF CLASS II SURFACE IMPOUNDMENT
AND POST-CLOSURE MAINTENANCE OF CLASS I LANDFILLS
SOLANO COUNTY

IT Environmental Liquidating Trust maintains closed Class I landfills and operates an active Class II surface impoundment at the Montezuma Hills Facility in Solano County. Waste discharge requirements (WDRs) for the facility are undergoing a regular 10-year update to bring them up to date with current standards and any changes at the facility. The site operated from 1979 to 1986 accepting liquids, sludges, and solids from gas and oil exploration and production activities, and the petroleum refining industry. Site closure was completed in 1991 by consolidating the waste into an onsite Class I landfill, and constructing a Class II surface impoundment for evaporation of impacted groundwater. The area from which wastes were excavated was also closed as a Class I landfill. A perimeter slurry wall was constructed around the entire 52-acre facility. Impacted groundwater is extracted from recovery wells and trenches located outside of the slurry wall, and discharged to the Class II surface impoundment for evaporation. The closed facility is jointly regulated by the California Department of Toxic Substances Control. Further information about the facility and the proposed requirements can be found in the tentative WDRs that are available on the Regional Water Board's website at www.waterboards.ca.gov/centralvalley/board_decisions/tentative_orders/.

A public hearing concerning this matter will be held during the Regional Water Board meeting which is scheduled for:

DATE: 11/12 September 2008
