NOTICE OF PUBLIC HEARING
concerning

**SPECIAL ORDER
FOR
CHEMICAL WASTE MANAGEMENT, INC.
KETTLEMAN HILLS FACILITY, KINGS COUNTY
MODIFYING WASTE DISCHARGE REQUIREMENTS ORDER NO. R5-2006-0122**

Chemical Waste Management, Inc. (CWMI) owns and operates the Kettleman Hills disposal facility. Non-hazardous Class II/III landfills B-17 and B-19 are regulated by Waste Discharge Requirements (WDRs) Order No. R5-2006-0122. An 18.23-acre portion of Waste Management Unit B-19, which no longer accepts solid waste, is operated and monitored as a bioreactor project in accordance with the WDRs and Federal Research Development and Demonstration regulations. Among other things, to operate as a bioreactor, Order No. R5-2006-0122 allows the introduction of supplemental non-hazardous liquids into the bioreactor to promote and continue the biodegradation of solid waste. In accordance with Federal regulations, the WDRs prohibit the continued addition of liquids into the bioreactor after three years from 15 September 2008, the date liquids were first introduced. The regulations specify that the project can only be operated in renewable three-year periods, not to exceed a total of 12 years. CWMI has requested to continue to operate the bioreactor project for another three year period. Modification of the Order will allow for the continued addition of non-hazardous liquids to continue the bioreactor project.
