

ITEM: 9

SUBJECT: Linda County Water District, Wastewater Treatment Plant,
Sutter and Yuba Counties

BOARD ACTION: *Consideration of a New Time Schedule Order*

BACKGROUND: Linda County Water District (Discharger) owns and operates a wastewater treatment plant (Facility) that is permitted to discharge up to 1.8 million gallons per day of disinfected secondary treated wastewater to the Feather River.

On 22 September 2006, the Central Valley Water Board adopted Waste Discharge Requirements Order R5-2006-0096 (NPDES Permit) and Time Schedule Order (TSO) R5-2006-0097 for the Discharger to comply with new tertiary effluent limitations. On 29 June 2010, the Central Valley Water Board issued amended TSO R5-2006-0097-01 that established further time schedules (by 21 September 2011) for full compliance with additional final effluent limitations contained in WDR Order R5-2006-0096. Construction is underway on new tertiary treatment facilities and completion is scheduled for December 2012. With the continued use of the existing treatment plant until construction is completed, the Discharger is not able to comply consistently with final effluent limitations in WDR Order R5-2006-0096.

The proposed Time Schedule Order rescinds amended TSO R5-2006-0097-01 and provides new compliance schedules for final effluent limitations until completion and operation of the new tertiary treatment facility, 31 December 2012.

ISSUES: Public comments regarding this item are due on 25 July 2011, after public noticing of the August 2011 Board meeting agenda package.
