

**LATE REVISIONS
LINDA COUNTY WATER DISTRICT
WASTEWATER TREATMENT PLANT
SUTTER AND YUBA COUNTIES
PROPOSED TIME SCHEDULE ORDER (NPDES No. CA0079651)
Regional Water Quality Control Board, Central Valley Region
Board Meeting – 4 August 2011
ITEM # 9**

Revisions to Proposed Time Schedule Order

1. Modify Finding 8 as shown in underline/strikeout format below:
 8. On 4 May 2011, the Discharger submitted “Linda County Water District Request to Extend NPDES Permit (Order No. R5-2006-0096; NPDES No. CA0079651) and Time Schedule Order (R5-2010-00906)” that included a request for an extension of the compliance schedule from 21 September 2011 until 31 December 2012 for the final effluent limitations for copper, lead, zinc, bis (2-ethylhexyl) phthalate, dibenzo (a,h) anthracene, aluminum, manganese, ammonia, EC, and mercury. In an Additional Infeasibility Analysis dated 23 June 2011, the Discharger requested interim limitations and new compliance schedules for the final effluent limitations for BOD, TSS, settleable solids, total coliform organisms, and nitrite.

2. Modify Finding 12 as shown in underline/strikeout format below:
 12. Per the requirements of CWC Section 13385(j)(3)(C)(ii)(I) for the purpose of treatment facility upgrade, the time schedule shall not exceed 10 years. Per the requirements of 13385(j)(3)(C)(ii)(II) following a public hearing, and upon a showing that the Discharger is making diligent progress toward bringing the waste discharge into compliance with the effluent limitation, the Central Valley Water Board may extend the time schedule for an additional five years, if the Discharger demonstrates that the additional time is necessary to comply with the effluent limitation. In accordance with CWC Section 13385(j)(3)(C)(ii)(I) the total length of the compliance schedules is less than ten years. The Central Valley Water Board finds, as described in previous findings in this Order, that the Discharger has demonstrated due diligence and is making diligent progress to bring the waste discharge into compliance with final effluent limitations. The Central Valley Water Board also finds that because of the Discharger’s construction schedule, additional time is necessary to comply with the final effluent limitations.

3. Modify Finding 13 as shown in underline/strikeout format below:
 13. ~~WDRs Order R5-2006-0096 provided protection from MMPs for BOD, TSS, settleable solids, EC, total coliform organisms, nitrite, and mercury until 21 September 2011. Compliance with this Order exempts the Discharger from MMPs for violations of the final effluent limitations for BOD, TSS, settleable solids, EC, total coliform organisms, nitrite, and mercury from date of adoption until 31 December 2012. In accordance with CWC section 13385(j)(3), the total length of protection is less than ten years.~~ Compliance with this TSO exempts the Discharger from mandatory minimum penalties

for violations of certain Final Effluent Limitations found in WDRs Order R5-2006-0096, as follows:

- a. Aluminum, ammonia, and manganese: Previous Orders provided protection from mandatory minimum penalties from 22 September 2006 through 21 September 2011. This Order provides protection from 4 August 2011 through 31 December 2012.
- b. Bis (2-ethylhexyl) phthalate, copper, dibenzo (a,h) anthracene, lead, and zinc: Previous Orders provided protection from 29 June 2010 through 21 September 2011. This Order provides protection from mandatory minimum penalties from 4 August 2011 through 31 December 2012.
- c. BOD, TSS, settleable solids, EC, total coliform organisms, mercury, and nitrite: These constituents have not previously been protected from mandatory minimum penalties. This Order provides protection from mandatory minimum penalties from 4 August 2011 through 31 December 2012.

4, Modify Finding 14 as shown in underline/strikeout format below:

14. ~~Amended TSO R5-2006-0097-01 provided protection from MMPs for bis (2-ethylhexyl) phthalate, copper, lead, zinc, dibenzo (a,h) anthracene, aluminum, ammonia, and manganese until 21 September 2011. Compliance with this Order exempts the Discharger from MMPs for violations of the final effluent limitations for bis (2-ethylhexyl) phthalate, copper, lead, zinc, dibenzo (a,h) anthracene, aluminum, ammonia, and manganese from date of adoption until 31 December 2012. In accordance with CWC section 13385(j)(3), the total length of protection from mandatory minimum penalties for the constituents listed in Finding 13 above, is less than ten years.~~
