North Coast Regional Water Quality Control Board  
Attn: Charles Reed

Dear Mr. Reed,

I am a property owner (resident) of property potentially located in a high priority area for onsite wastewater disposal systems as designated in the proposed Basin Plan amendment. The options proposed for existing onsite wastewater disposal systems in the Basin Plan amendment are unnecessarily burdensome, inadequately researched, poorly substantiated by the study, and not a cost effective solution for reduction of bacterial load on the Russian River from onsite septic systems.

**Please consider removing the TMDL from the Board's meeting calendar** until able to engage further with the communities and the County to develop a TMDL that we all can support. I look forward to seeing a well researched, reasonable, well substantiated, effective and affordable plan for the necessary reduction of pathogens in the Lower Russian River. My formal request appears in the attached PDF document/letter.

Signed: The Rev. Dr. Joseph E. Indano, local property owner

**Wishing you much joy with great Love in all you do,**
