

CALAVERAS COUNTY DEPARTMENT OF PUBLIC WORKS, ROCK CREEK  
MUNICIPAL SOLID WASTE CLASS II LANDFILL AND CLASS II SURFACE  
IMPOUNDMENT, Calaveras County

The 200-acre facility is about one mile east of Milton in Calaveras County. The facility consists of a Class II landfill, which is being constructed in four phases. Each phase will include a surface impoundment for leachate storage and evaporative disposal. This revision reflects the expansion of the facility with the construction of a new double lined cell. This cell, Phase II-B, will accept Class II and III municipal solid waste on 7.3 acres directly south of the existing Phase II-A.

The facility accepts municipal solid waste, ash, sewage treatment sludge, petroleum contaminated soil, and miscellaneous materials. These wastes are classified as "nonhazardous solid waste" or "designated waste", using the criteria set forth in Title 27. Surface water discharge is to Rock Creek, a tributary of the San Joaquin River. (MMW)
