BOARD ACTION: *Rescission Of Cleanup And Abatement Order*

BACKGROUND: In 1989, a release occurred from three underground storage tanks located on the Dischargers' property. The release resulted in two free-product plumes totaling 20,000 gallons, a dissolved phase plume covering 10 acres, and impacts to an estimated 300,000 cubic yards of soil. Because of the magnitude and extent of contamination, the Board adopted Cleanup and Abatement Order (Order) 94-325. From 1993 to 1994, the site was remediated by free-product removal and soil vapor extraction. In January 2005, the monitoring and air-sparge wells were decommissioned. The Dischargers have complied with the requirements of the Order, and the site is considered closed.

ISSUES: None

RECOMMENDATION: Adopt the proposed Order rescinding the Cleanup and Abatement Order
