**NOTICE OF PUBLIC HEARING**  
concerning

**WASTE DISCHARGE REQUIREMENTS (WDR)  
NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM (NPDES)  
PERMIT NO. CA0085171  
AND TIME SCHEDULE ORDER  
for**

**STATE OF CALIFORNIA, DEPARTMENT OF PARKS AND RECREATION  
EMPIRE MINE STATE HISTORIC PARK  
NEVADA COUNTY**

The State of California, Department of Parks and Recreation (Discharger) owns and operates a wastewater treatment facility at Empire Mine State Historic Park, which includes a historic gold mine. The treatment facility was newly installed in November 2011 and consists of a settling pond and two wetlands designed to passively remove arsenic, iron, manganese, and turbidity from up to 2.3 million gallons per day (MGD) of mine drainage. The treated mine drainage is discharged to Magenta Drain Channel, a tributary to the Bear River via South Fork Wolf Creek and Wolf Creek.

The Central Valley Regional Water Quality Control Board (Central Valley Water Board) will consider renewal of the Discharger's existing NPDES Permit (WDR Order R5-2006-0058) and a new Time Schedule Order. The proposed Permit includes final effluent limits for acute and chronic toxicity, arsenic, dissolved oxygen, iron, manganese, turbidity, and color. Due to no detection, or detection below criteria, effluent limits for a number of metals are no longer included in the proposed Permit. The effluent limits for iron and manganese were based on a monthly average in the existing NPDES Permit. However, in the proposed Permit, the effluent limits for iron and manganese are based on a yearly average. The proposed Time Schedule Order includes a new 3-year time schedule for the Discharger to comply with the final effluent limits for dissolved oxygen and turbidity. Also, an additional 3-year time schedule is proposed to extend the existing time schedule for compliance with arsenic, iron, and manganese final effluent limitations.

A public hearing concerning this matter will be held during the Central Valley Water Board meeting scheduled for:
