Subject: Box Canyon and the Clean Water Act

Dear Stacy:

I understand you are receiving comments re the Mt. Shasta Wastewater Treatment Plant and renewal of their permit concerning discharges to the upper Sacramento River. I am writing to ask that this discharger and their proposed discharges be given additional scrutiny due to the significance of the upper Sacramento as a wild trout fishery and as world-class whitewater run.

Thank you for your consideration. I have floated and fished this stretch and consider it to be worthy of our highest protection. It is truly a nationally significant waterway.

Sincerely yours, Grant
