Subject: New Permit

Dear Mr. Mark Smythe:

Upon review of California Regional Water Quality Control Board's notice of preparation of an industrial storm water permit specifically for the scrap metal recycling industry, Fontana Recycling feels that we should not be subject to this new permit.

Fontana Recycling does not recycle any type of metal whether ferrous or non-ferrous from any private or non-private vendors. Instead we collect and recycle only waste paper materials such as computer paper, old corrugated cardboard and old newspapers. Moreover, Fontana Recycling does not process any CRV items at this point and has no future schedule to process any CRV at our facility. Fontana Recycling has absolutely zero scrap metal runoffs that should concern the California Regional Water Quality Board to be grouped as a scrap metal recycler.

Fontana Recycling understands the concerns of Urban Waste Water Contamination but does not produce the type of contamination in the water runoff as a scrap metal recycler.

If you have any questions please don't hesitate to contact me at (909) 829-7100.

Yours Sincerely,

Stephen Kim  
Assistant Manager
