**Subject:** Salt & Nutrient Management Plan

Fisayo,

This is a follow up email from our phone conversation requesting Regional Water Quality Control Board consider extending the August 17, 2017 Salt and Nutrient Management Plan to August 17, 2018. Poway has received notification of Tentative Order No. R9-2016-0117, Water Reclamation Requirements for the City of Poway identifying Poway will need to submit a Salt and Nutrient Management Plan for the Poway groundwater basin by August 17, 2017. Both the City of Poway and the City of San Diego are stakeholders operating within the Poway Basin and will need to coordinate with each other to complete the plan.

Terry Zaragoza  
Interim Public Works Utilities Manager  
City of Poway, Public Works
