Santa Ana, CA 92703

**CLEAN WATER ACT SECTION 401 WATER QUALITY STANDARDS  
CERTIFICATION FOR THE LINCOLN AVENUE WIDENING OVER SANTA ANA  
RIVER PROJECT, COUNTY OF ORANGE, CALIFORNIA (ACOE REFERENCE NO.  
NOT AVAILABLE) (SARWQCB PROJECT NO. 302012-35)**

Dear Ms. Khan:

On September 17, 2012, we received an application for Clean Water Act Section 401 Water Quality Standards Certification ("Certification") from Orange County (OC) Public Works for a project to widen the existing Lincoln Avenue Bridge over the Santa Ana River from 68 feet to 104 feet, in order to accommodate traffic lanes, sidewalks, and bicycle lanes. The project will widen the bridge 18 feet on each side. This letter responds to your request for certification that the proposed project, described in your application and summarized below, will comply with State water quality standards outlined in the Water Quality Control Plan for the Santa Ana River Basin (1995) (Basin Plan) and subsequent Basin Plan amendments:

**Project Description:** Lincoln Avenue Bridge allows traffic to cross the Santa Ana River. The Santa Ana River through the project area is a riprap-sided, earthen bottomed flood control channel operated by the Orange County Flood Control District (OCFCD). The existing bridge consists of 12 and 14-foot wide traffic lanes and one eight-foot shoulder in each direction. OC Public Works plans to extend the existing pier walls, footings, and bridge abutments. This will necessitate the permanent removal of 0.01 acre (41.4 linear feet) of streambed habitat behind the existing retaining walls and the bridge's pier wall footings, as well as, accommodate widened abutment walls, and construction of underground storm drain pipes.

CAROLE H. BESWICK, CHAIR | KURT V. BERCHTOLD, EXECUTIVE OFFICER

3737 Main St., Suite 500, Riverside, CA 92501 | [www.waterboards.ca.gov/santaana](http://www.waterboards.ca.gov/santaana)

A staging area will be utilized alongside the west levee, west of OC Water District's ground water recharge basin, north of Lincoln Avenue. Access to the channel will be limited to the central levee.

The work will take place within Township 4 South, Range 9 West, of the U.S. Geological Survey *Orange, California* quadrangle map (33° 50' 4.878" N/ 117° 51' 43.014" W).

Receiving water: Santa Ana River Reach 2

Fill area: 0.01 acre of permanent impact to disturbed streambed (flood control channel) habitat (41.4 linear feet)

Dredge/Fill volume: N/A

Federal permit: U.S. Army Corps of Engineers Nationwide Permit No. 14

You have proposed to mitigate water quality impacts as described in your Certification application. The proposed mitigation is summarized below:

**Onsite Water Quality Standards Mitigation Proposed:**

- Standard water quality related best management practices (BMPs) will be employed during construction activities.

**Offsite Water Quality Standards Mitigation Proposed:**

- None.

Should the proposed project impact state- or federally-listed endangered species or their habitat, implementation of measures identified in consultation with U.S. Fish and Wildlife Service and the California Department of Fish and Wildlife will ensure those impacts are mitigated to an acceptable level. Appropriate BMPs will be implemented to reduce construction-related and post-construction impacts to Waters of the State according to the requirements of Order No. R8-2009-0030 (NPDES Permit No. CAS618030), commonly known as the Orange County Municipal Storm Water Permit, and subsequent iterations thereof. Order No. R8-2009-0030 requires that you substantially comply with the requirements of State Water Resources Control Board's General Permit for Storm Water Discharges Associated with Construction Activity. Appropriate post construction BMPs, as well as, operations and maintenance (O&M) activities related to control measures to minimize potential impacts to Waters of the State should be consistent with management practices required within the State Water Resources Control Board Order No. 2012-0011-DWQ (NPDES Permit No. CAS000003), commonly known as the Statewide CalTrans Storm Water Permit, and subsequent iterations thereof.

Pursuant to California Code of Regulations, Title 14, Section 15096, subdivision (f), the Regional Board must consider the environmental effects of a project as shown in an Environmental Impact Report or Negative Declaration prior to reaching a decision on the project.

The Regional Board has considered the County's November 20, 2012 Mitigated Negative Declaration (MND) for this project before issuing this Certification, particularly those sections of the MND that relate to water quality. Based on the mitigation proposed in the MND and application, and the conditions set forth in this Certification, the Regional Board independently finds that impacts to water quality will be reduced to a less-than-significant level and beneficial uses will be protected. The Regional Board concludes that changes or alterations have been required or incorporated into the project that avoid or mitigate impacts to water quality to a less-than-significant level.

**This 401 Certification is contingent upon the execution of the following conditions:**

- 1) The applicant must comply with the requirements of the applicable Clean Water Act section 404 permit.
- 2) All materials generated from construction activities associated with this project shall be managed appropriately. This shall include identifying all potential pollution sources within the scope of work of this project, and incorporating all necessary pollution prevention BMPs as they relate to each potential pollution source identified.
- 3) The project proponent shall utilize BMPs during project construction to minimize the controllable discharges of sediment and other wastes to drainage systems or other waters of the state and of the United States.
- 4) Substances resulting from project-related activities that could be harmful to aquatic life, including, but not limited to, petroleum lubricants and fuels, cured and uncured cements, epoxies, paints and other protective coating materials, portland cement concrete or asphalt concrete, and washings and cuttings thereof, shall not be discharged to soils or waters of the state. All waste concrete shall be removed.
- 5) Motorized equipment shall not be maintained or parked within or near any stream crossing, channel or lake margin in such a manner that petroleum products or other pollutants from the equipment may enter these areas under any flow conditions. Vehicles shall not be driven or equipment operated in waters of the state on-site, except as necessary to complete the proposed project. No equipment shall be operated in areas of flowing water.

- 6) This Water Quality Certification is subject to the acquisition of all local, regional, state, and federal permits and approvals as required by law. Failure to meet any conditions contained herein or any the conditions contained in any other permit or approval issued by the State of California or any subdivision thereof may result in the revocation of this Certification and civil or criminal liability.
- 7) Best management practices to stabilize disturbed soils must include the use of native plant species whenever feasible.
- 8) Applicant shall ensure that all fees associated with this project shall be paid to each respective agency prior to conducting any on-site construction activities.

Under California Water Code, Section 1058, and Pursuant to 23 CCR §3860, the following shall be included as conditions of all water quality certification actions:

- (a) Every certification action is subject to modification or revocation upon administrative or judicial review, including review and amendment pursuant to Section §13330 of the Water Code and Article 6 (commencing with Section 3867) of this Chapter.
- (b) Certification is not intended and shall not be construed to apply to any activity involving a hydroelectric facility and requiring a FERC license or an amendment to a FERC license unless the pertinent certification application was filed pursuant to Subsection §3855(b) of this Chapter and that application specifically identified that a FERC license or amendment to a FERC license for a hydroelectric facility was being sought.
- (c) Certification is conditioned upon total payment of any fee required under this Chapter and owed by the applicant.

If the above stated conditions are changed, any of the criteria or conditions as previously described are not met, or new information becomes available that indicates a water quality problem, the Regional Board may require the applicant to submit a report of waste discharge and obtain Waste Discharge Requirements.

In the event of any violation or threatened violation of the conditions of this certification, the holder of any permit or license subject to this certification shall be subject to any remedies, penalties, process or sanctions as provided for under state law. For purposes of section 401(d) of the Clean Water Act, the applicability of any state law authorizing remedies, penalties, process or sanctions for the violation or threatened violation constitutes a limitation necessary to assure compliance with the water quality standards and other pertinent requirements incorporated into this certification. Violations of the conditions of this certification may subject the applicant to civil liability pursuant to Water Code section 13350 and/or 13385.

This letter constitutes a Water Quality Standards Certification issued pursuant to Clean Water Act Section 401. I hereby issue an order certifying that any discharge from the referenced project will comply with the applicable provisions of Sections 301 (Effluent Limitations), 302 (Water Quality Related Effluent Limitations), 303 (Water Quality Standards and Implementation Plans), 306 (National Standards of Performance), and 307 (Toxic and Pretreatment Effluent Standards) of the Clean Water Act, and with other applicable requirements of State law. This discharge is also regulated under State Water Resources Control Board Order No. 2003-0017-DWQ (Order No. 2003-0017-DWQ), "General Waste Discharge Requirements for Dredge and Fill Discharges That Have Received Water Quality Certification" which requires compliance with all conditions of this Water Quality Standards Certification. Order No. 2003-0017-DWQ is available at:

[www.waterboards.ca.gov/board\\_decisions/adopted\\_orders/water\\_quality/2003/wqo/wqo\\_2003-0017.pdf](http://www.waterboards.ca.gov/board_decisions/adopted_orders/water_quality/2003/wqo/wqo_2003-0017.pdf)

Should there be any questions, please contact Marc Brown at (951) 321-4584, or Mark Adelson at (951) 782-3234.

Sincerely,

*for* 

Kurt V. Berchtold
