

San Diego Creek Causal Assessment Meeting

April 21, 2015 SCCWRP Large Conference Room

Agenda

9:00 – 9:15 – Welcome, coffee and bagels

9:15 – 10:00 – Review of candidate causes

- We have filled out the specifics for the candidate causes we created last meeting. We'll review them and have some discussion about data inventory: who has the data, getting it to David, and sharing it amongst the group

10:00 – 10:30 – Refresher on conceptual models and ICD (EPA Model Tool) demonstration

- Brief review of what the models are for and how they are constructed. We will also do a demonstration of the EPA online model tool.

10:30 – 12:00 – Working on SD Creek conceptual models

- We'll begin constructing the models for the SD Creek case

12:00 – 1:00 – Lunch

1:00 – 2:30 – Keep working on SD Creek conceptual models

2:30 – 3:00 – Discussion of comparator sites

- We'll take an initial look at the comparator sites that were selected for the case using the environmental gradient approach we agreed upon at the last meeting.

3:00 – 3:30 – Orange County Data Portal primer

- Staff from Orange County will provide us with a tutorial on using their GIS and file sharing tools. Ideally we can use these for sharing data and reviewing products from the subsequent parts of the assessment

Note – We would recommend bringing a computer if you're interested in working with the ICD conceptual model tool. You will need to register ahead of time and should have received registration instructions from David Gillett a few days ago.
