**COUNTY OF VENTURA VECTOR CONTROL PROGRAM 2012 ANNUAL NPDES REPORT**

In conformance with the requirements of the Statewide NPDES Permit for Biological and Residual Pesticide Discharges to Waters of the United States from Vector Control Applications (Water Quality Order No. 2011-0002-DWQ), attached is the 2012 Annual Report prepared by the County of Ventura, Environmental Health Division, Vector Control Program (VCEHD).

The VCEHD is a member agency of the Mosquito and Vector Control Association of California (MVCAC)'s NPDES permit Coalition. All required chemical and physical monitoring was conducted by the MVCAC Coalition. The results of the MVCAC Coalition's monitoring are submitted separately in the MVCAC Coalition's annual report.

If you have any questions, please call Darrell Siegrist, Manager, VCEHD Technical Services Section at 805/648-9248.

Randall Smith, R.E.H.S.  
Vector Control Program Supervisor  
Environmental Health Division

1. **Annual Report**

a. Executive Summary

The County of Ventura Vector Control Program complied with the applicable components of the General NPDES Permit for Biological and Residual Pesticide Discharges from Vector Control Applications (General Permit). The Program is a member of the MVCAC NPDES Permit Coalition and the Coalition conducted all required chemical and physical monitoring. The results of the Coalition's monitoring will be included in the Coalition Annual Report that will be sent separately to the SWRCB and Regional Boards.

The Program made 4,144 applications to waters of the U.S. during the 2012 calendar year. The log of these applications can be found in Attachment B. In this first year of implementation, we planned our visual monitoring work based on historical patterns of frequency and emergence during the mosquito season, and to coincide with the concentration of the greatest number of sites that peak in late summer. Our plans sought to reduce loss of critical staff time for visual monitoring where long distance travel to emergence sites would be required and to minimize loss in our ability to prevent emergence at the greatest number of larval habitat sites. As a result of the determination by the SWRCB to suspend visual monitoring in July to ensure that we reached as many larval sites as possible to prevent WNV, no visual monitoring occurred in 2012. The Program continued to follow the guidelines of its Pesticide Application Plan (PAP).

b. Summary of Monitoring Data

Recognizing the need of mosquito control programs to quickly find and treat mosquito breeding sites to prevent the spread of disease, such as West Nile virus, the SWRCB issued a letter to the MVCAC dated July 13, 2012 that indicated the visual monitoring requirement would no longer be required of individual Districts.

Per the instructions in the letter, the Coalition will provide information on the incidence of West Nile virus and other similar public health threats in the Coalition's annual report.

For the reasons stated above, the Program will no longer be collecting visual monitoring data.

c. BMP Identification

BMP's utilized by the Program are outlined in the Program's PAP. These include: emphasis on reducing mosquito breeding habitat through non-chemical means, training employees to prevent spills, apply appropriate amounts of chemical in each treatment area, calibrate application equipment, and use a biology based assessment for determining treatment thresholds.

d. Violation Discussion

No violations of the General Permit by the Program were observed.

e. Map of Applications

See Attachment A

f. Log of Applications made to Waters of the U.S.

Attachment B includes all application data on the covered application areas.

g. General Information on Applications

Attachment B includes information on dosage, concentration, and quantity of each pesticide used which are derived from the individual pesticide labels.

h. Visual Monitoring Data

Visual Monitoring Data was not collected for reasons stated above.

i. BMP, PAP, Monitoring Program Recommendations

No recommendations are being proposed to improve the current BMP's, PAP, or monitoring plan. Any changes to the Coalition Monitoring Plan will be highlighted in the Coalition Monitoring Annual Report.

j. Log of Pesticide Applications made to Waters of the U.S.

A representation of the pesticide application log is contained in Attachment B.

2. **Updated PAP Components**

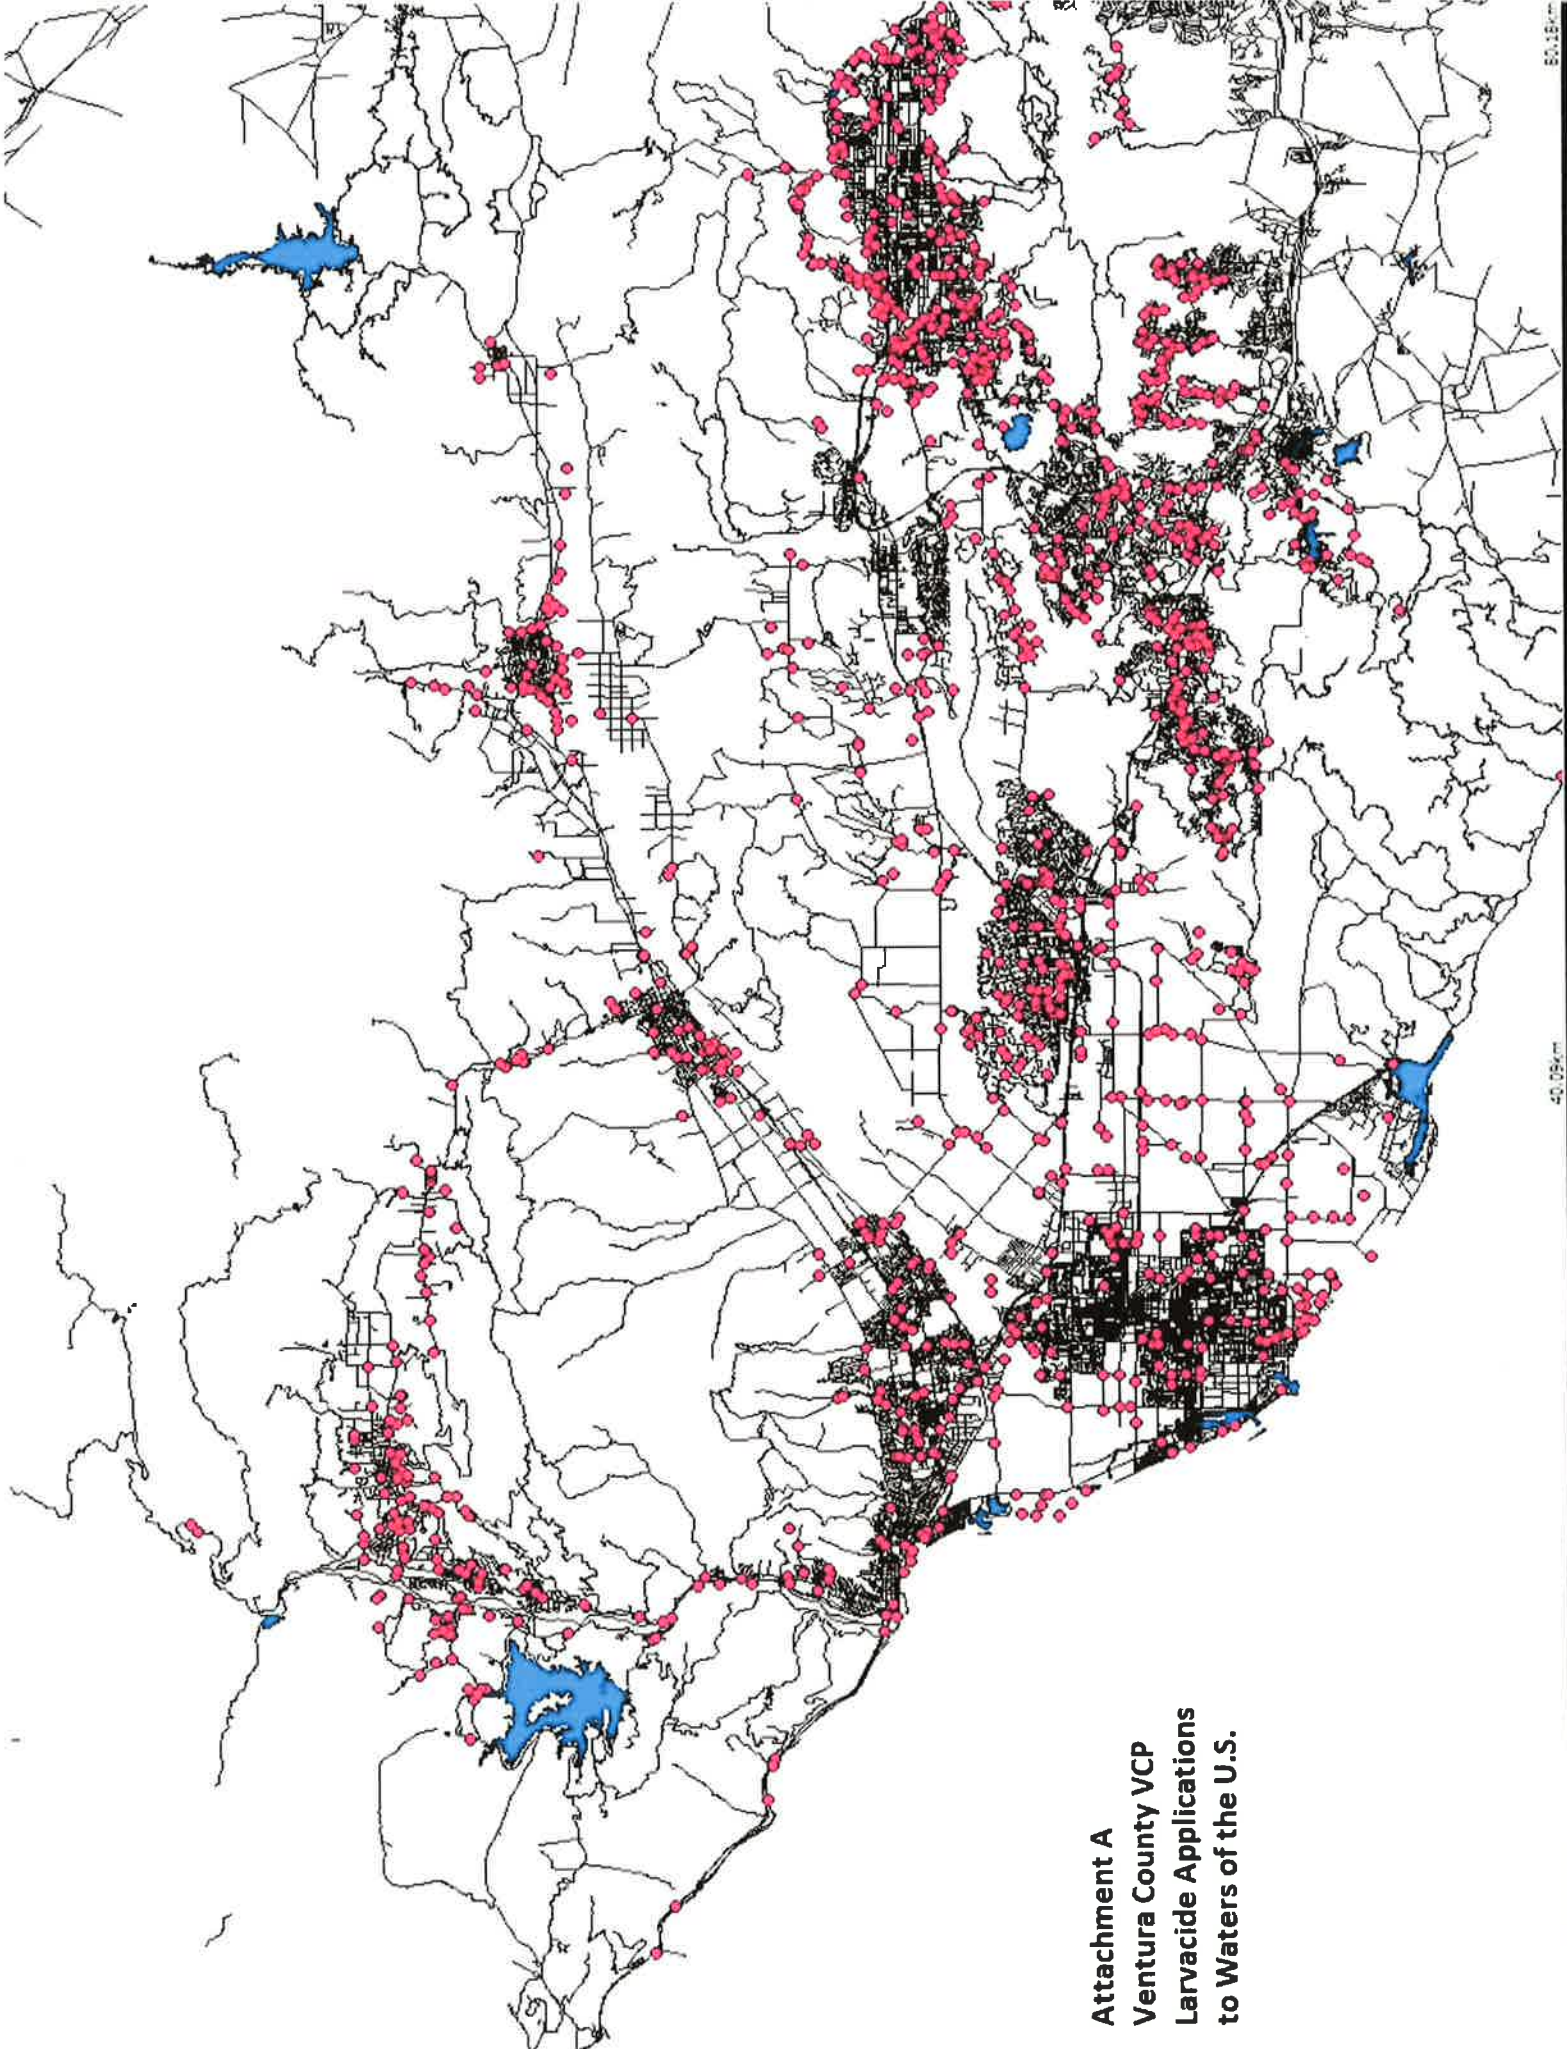

N/A

3. **Self Monitoring Reports**

N/A

4. **Monitoring Reports**

The Coalition Monitoring Annual Report will summarize all physical measurements and chemical monitoring done for 2011 and 2012.
