

Dear Chairwoman Marcus:

(cc: Vice Chair Frances Spivy-Weber, Tam Doduc, Steven Moore, Dorene D'Amamo)

You are probably getting a lot of these form letters. I would hope you are already aware of the facts they contain, so I have deleted the form letter in favor of just asking you to require PG&E to install modern cooling towers at their Diablo Canyon power plant. We the people of California have a coastal protection policy for a reason - for many reasons - and allowing PG&E an exemption at Diablo Canyon makes no sense.

Please require PG&E to build modern cooling towers at Diablo Canyon, without any further delay. Thank you.

Hannah Blair
