JUL 20 2012

Jeanine Townsend
Clerk to the Board
State Water Resources Control Board
1001 I Street, 24th Floor
Sacramento, CA 95814

Re: Draft Phase II Small MS4 General Permit

Dear Ms. Townsend:

The following are EPA Region 9's comments on the draft general NPDES permit for Phase II small municipal separate storm sewer systems (MS4s) located within the State of California, which the State Board released for public comment on May 21, 2012. In a letter to the State Board dated May 18, 2012, Region 9 provided comments on a pre-public notice version of the draft permit which was similar in most respects to the permit which was public noticed on May 21, 2012. We also provided comments on earlier versions of this permit in letters to the Board dated March 24, 2011 and September 8, 2011. For the most part, we are satisfied with the latest version of the permit which the Board has proposed. However, regarding low impact development requirements, we still have a few concerns which are discussed below.

A. *Low Impact Development (LID) Requirements*

In our letters commenting on earlier versions of the draft Phase II permit, we recommended LID requirements comparable to those incorporated into recent California Phase I MS4 permits and we provided a number of examples of such permits, noting that generally consistent requirements had been adopted in all the permits. We are pleased to see the latest draft Phase II permit includes requirements similar to the Phase I permits, i.e., management using LID of the runoff from the 85% storm event. Nevertheless, there are still a few differences and we believe implementation of the stormwater program statewide would benefit by having as much consistency as possible between Phase I and II MS4 permits.

Under Section E.12.d.2.ii of the draft Phase II permit, excess runoff would be directed to facilities which infiltrate, evapotranspire, and/or biotreat runoff. In the California Phase I MS4 permits, biotreatment with an underdrain is allowed only if the preferred LID management techniques (infiltration, evapotranspiration or harvesting/reuse) are demonstrated to be infeasible. We recommend the Phase II permit mirror the Phase I permits in this regard. The California Phase I permits also require

offsite mitigation (or payment in lieu) for any volume which cannot feasibly be managed onsite with LID. We recommend the Phase II general permit include similar provisions.

Sections E.12.d.2.ii.(3)(a) through (h) of the draft Phase II permit include numerous design criteria for the stormwater treatment and baseline hydromodification measures. We recommend that the fact sheet provide an explanation and justification for the criteria; presumably they were derived from a reputable design manual or other appropriate source, but additional information concerning these criteria should be provided.

Section E.12.d.2.ii.(3).c.(c) includes a reference to "smart growth credits" as a category of Regulated Project. We found no further explanation of potential credits for smart growth in the permit or fact sheet, and we recommend the Board clarify its intent in the final fact sheet.

There appears to be something missing in Section E.12.d.2.ii.(3) between the words "in" and "below" regarding the amount of runoff to be managed. The permit may be intending to refer to the criteria in Section E.12.d.2.ii.(3).d. Finally, in Sections E.12.d.2.ii.(3).a and b, there is a reference to "(2)" and it appears the permit intended to refer to "(3)".

B. Total Maximum Daily Load (TMDL) Requirements

In our letter of May 18, 2012, we supported the provisions of the pre-notice draft permit implementing TMDLs for the permittees, noting that applicable wasteload allocations (WLAs) had been incorporated into the draft permit as numeric effluent limits, along with applicable compliance deadlines and any additional requirements identified in the TMDLs. This is consistent with our objective of ensuring clear, measurable and enforceable permit requirements in MS4 permits. The requirements of the pre-notice permit were retained in the permit of May 21, 2012, and we urge the Board to retain these requirements in the final permit as well.

We note that the draft permit does ask the Regional Boards to propose any appropriate revisions to the TMDL requirements within six months of the permit effective date, and that such revisions would be incorporated into the permit via a reopener. However, it appears that most of the applicable requirements have already been identified by the Board and included in the draft permit, and we would concur with the Board's procedures.

Section F.5.I of the draft permit requires non-traditional MS4s to comply with all applicable WLAs identified in Attachment G. In reviewing Attachment G, we found only one non-traditional MS4 listed (Cal-Poly State University within Regional Board 3). In working with the Regional Boards on any appropriate revisions of the permit, we

recommend the State Board specifically consider whether there are any additional non-traditional MS4s which are subject to WLAs and need to be listed in Attachment G.

C. MS4 Coverage and the 2010 Census

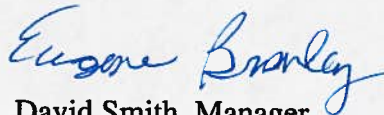

The draft fact sheet (section VI.b) refers to the 2010 census and points out that new MS4 areas may be subject to permitting based on the new census, but it does not provide specific information in this regard. We recommend the final fact sheet further clarify the effect of the 2010 census on the geographic areas covered by the permit. We have enclosed a spreadsheet which lists the names of new traditional MS4s across the country which are subject to permitting based on the 2010 census. There are no new traditional MS4s in California. Although there are three new urbanized areas in California from the 2010 census (77 FR 18652, March 27, 2012) which are Woodland, Delano and Arroyo Grande, these MS4s had already been designated by the Board under the previous permit.

We have also enclosed a map showing how existing urbanized areas in the State have expanded as a result of the new census; these new areas would need to be addressed by existing permittees, and the map may assist the Board in implementation of the permit. We are also providing an electronic version of the map which may be expanded to more clearly show particular areas of the State. Additional information including maps of specific urbanized areas is available at:

http://www2.census.gov/geo/maps/dc10map/UAUC_RefMap/ua/

We appreciate the opportunity to provide our views on the draft permit. If you have any questions regarding this matter, please contact Eugene Bromley of the NPDES Permits Office at (415) 972-3510.

Sincerely,

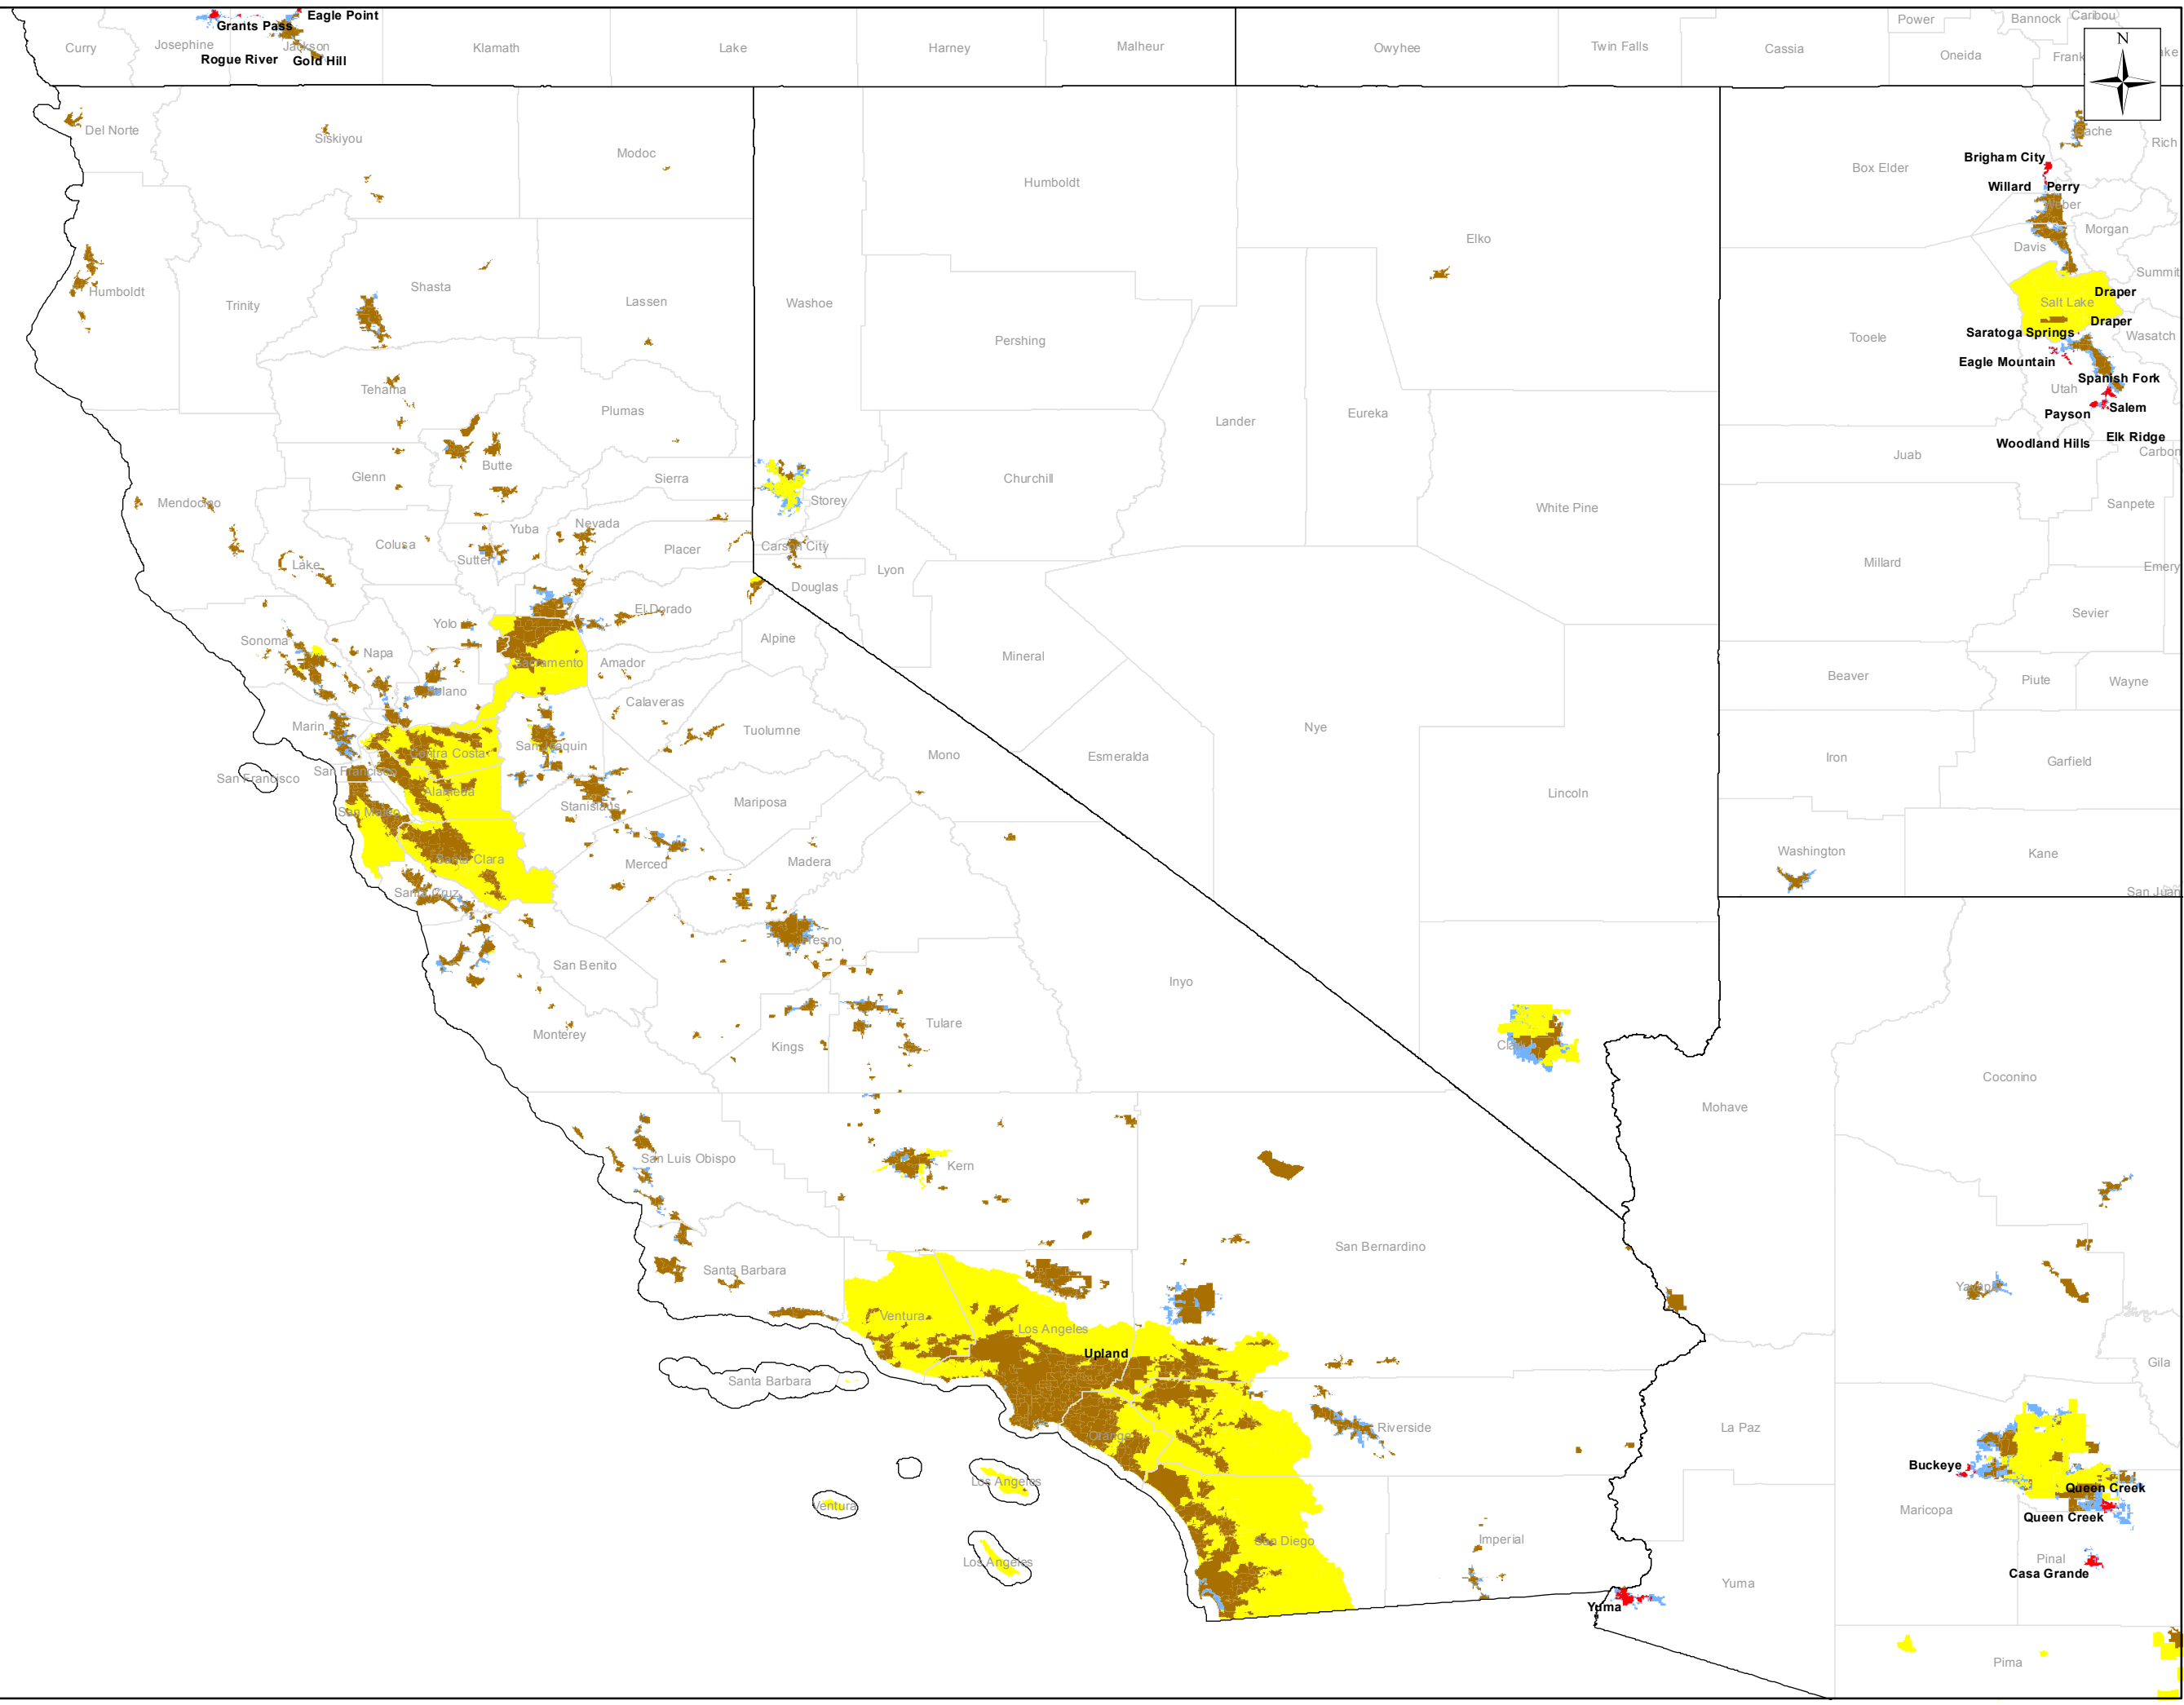

for David Smith, Manager
NPDES Permits Office (WTR-5)
