Sacramento, CA 95814

Re: Comment Letter – Trash Amendments

I wish to thank the Board for the opportunity to provide a comment on the proposed Statewide Trash Amendment. I support the Board's position that Full Capture Systems, along with institutional controls, will play a valuable role in assisting municipalities comply with the forthcoming trash control measures. My one comment is in regard to Section 5.1.5 Gross Solids Removal Devices. Our firm manufactured the initial linear radial gross solids removal device for Caltrans' field and laboratory studies and it was one of the first certified as a Full Capture system by the LARWQB in 2004. We continue to manufacture these non-proprietary screens today for Caltrans and have had our screens installed by several other municipalities in California and in other states throughout the U.S. We have also broadened the initial Caltrans design to accommodate larger flows typical for urban and commercial areas. It is noted that manufacturers of the basin inserts, continuous deflection systems, and netting systems have their names included in sections 5.1.2 through 5.1.4. For the benefit to municipalities seeking to locate a manufacturer of the linear radial device, I respectfully request that Roscoe Moss Company's name be included as a manufacturer in the Linear Radial Device section of the Final Draft.

Thank you for your consideration in this matter and please feel free to contact me if you have any questions or require any additional information.

Very truly yours,

A handwritten signature in black ink, appearing to read "Kevin McGillicuddy".
