**Give Reason for Proposed Changes:**

Petitioner has developed lands outside of the permitted Place of Use. The purpose of this Petition is to accurately describe the project as it is being operated and to accommodate additional lands to be planted. Petitioner also wants the ability to commingle water diverted under this Permit in the six existing reservoirs named in License 9916 (A18702), License 9917 (A22328) and Permit 20916 (A30373), as needed for the operation of the project.

Petition for Change

Petition for Extension of Time

Permit 20916 (Application 30373)

Before the State Water Resources Control Board (SWRCB) can approve a petition to change your water right permit or a petition for extension of time to complete use, the SWRCB must consider the information contained in an environmental document prepared in compliance with the California Environmental Quality Act (CEQA). This form is not a CEQA document. If a CEQA document has not yet been prepared, a determination must be made of who is responsible for its preparation. As the petitioner, you are responsible for all costs associated with the environmental evaluation and preparation of the required CEQA documents. Please answer the following questions to the best of your ability and submit any studies that have been conducted regarding the environmental evaluation of your project. If you need more space to completely answer the questions, please number and attach additional sheets.

1. DESCRIPTION OF PROPOSED CHANGES OR WORK REMAINING TO BE COMPLETED

For a petition to change, provide a description of the proposed changes to your project including, but not limited to, type of construction activity, structures existing or to be built, area to be graded or excavated, increase in water diversion and use (up to the amount authorized by the permit), changes in land use, and project operational changes, including changes in how the water will be used. For a petition for extension of time, provide a description of what work has been completed and what remains to be done. Include in your description any of the above elements that will occur during the requested extension period.

b. Will you be preparing an archeological report to satisfy another public agency?  YES  NO  
c. Do you know of any archeological or historic sites located within the general project area?  YES  NO

\* Re: Item 4a: The California Department of Forestry prepared a Timber Conversion Permit and a Timber Harvest Plan for a portion of the project.

ENVIRONMENTAL INFORMATION FOR PETITIONS

If YES, explain: Archaeology Surveys have been prepared for all of  
the existing and proposed vineyard and reservoir  
areas. All identified sites are located outside  
of the existing and proposed Place of Use.

See Attachment No. \_\_\_\_\_

**7. ENVIRONMENTAL SETTING**

Attach three complete sets of color photographs, clearly dated and labeled, showing the vegetation that exists at the below-listed three locations. For time extension petitions, the photographs should document only those areas of the project that will be impacted during the requested extension period.

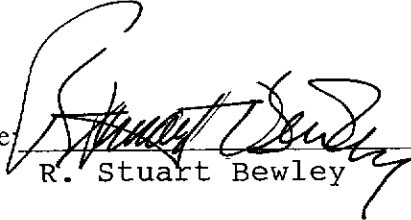

- Along the stream channel immediately downstream from the proposed point(s) of diversion.
- Along the stream channel immediately upstream from the proposed point(s) of diversion.
- At the place(s) where the water is to be used.

Permit 20916 (Application 30373)

**1. Description of proposed changes or work relating to be completed.**

The Petitioner is concurrently filing petitions for change for the three rights associated with the property, License 9916 (A18702), License 9917 (A22328) and Permit 20916 (A30373). Petitioner proposes to add additional place of use, as shown on the attached map, and to operate the existing reservoirs named in the above rights so that water may be transferred between them as needed to serve the place of use. Petitioner is also filing a Petition for Extension of Time for Permit 20916 to allow additional time to develop the place of use.

License 9916 (A18702) allows for the direct diversion of 0.5 cfs water from Mud Springs Creek from June 1 to October 15 and the diversion and storage of 47 acre-feet of water in the existing Lower Forest Range Reservoir located on an unnamed stream to be collected from October 15 of each year to May 1 of each succeeding year. The total amount of water diverted cannot exceed 182 acre-feet. The maximum amount that can be placed to beneficial use is 111 acre-feet annually. Water is authorized for irrigation of 84 acres on the property (see attached map).

License 9917 (A22328) allows for the diversion and storage of 42 acre-feet of water in the existing Upper Forest Range Reservoir located on an unnamed stream to be collected from October 15 of each year to May 1 of each succeeding year. The total amount of water diverted and put to beneficial use cannot exceed 42 acre-feet. Water is authorized for irrigation of 97 acres on the property (see attached map).

Permit 20916 (A30373) allows for the diversion and storage of 199.6 acre-feet of water in four separate reservoirs (49.9 acre-feet each) located on unnamed streams to be collected from November 1 of each year to March 31 of each succeeding year. The total amount of water diverted and put to beneficial use cannot exceed 199.6 acre-feet. Water is authorized for irrigation of 125 acres on the property (see attached map).

Petitioner has developed lands located outside of the authorized place of use. Presently there are 100 acres of vineyard develop on the property. The majority of the developed lands are named in a Timber Conversion Plan (TCP) approved by the California Department of Forestry on May 10, 1999 and a Timber Harvest Plan (THP) approved by the California Department of Forestry on May 18, 1999. An archeological survey has been completed for all existing and proposed place of use. A biological survey has been completed for all lands included in the TCP and THP. Petitioner understands that additional studies may be required for the existing and proposed place of use that has not already been subject to review.

Currently the developed lands are irrigated by the six reservoirs named in the three rights named above and from groundwater sources. Petitioner proposes to increase the place of use to 881 acres (as shown on the attached map).

Attachment A to Accompany  
Environmental Information Form  
Bewley-Motluk Family Limited Partnership  
Permit 20916 (Application 30373)

Petitioner also proposes to name each of the six reservoirs as points of diversion under each right. This will allow the Petitioner to commingle water throughout the system of ponds as needed for irrigation and frost protection of all the proposed and existing place of use. The total amount of water to be diverted, under Licenses 9916 & 9917 and Permit 20916 will not exceed 423.6 acre-feet.

All of the reservoirs are built and currently storing water. The majority of the pipelines connecting the ponds to the place of use are existing. The undeveloped proposed place of use and associated irrigation system will need to be established pursuant to this petition.
