NOTICE OF PETITION FOR CHANGE AND RENOTICE OF PETITIONS FOR CHANGE AND EXTENSION OF TIME FOR TAHOE CITY PUBLIC UTILITY DISTRICT'S WATER RIGHT PERMITS 13531, 14334, 14331, 14337, 14746, 14572, AND 14931 (APPLICATIONS 18283, 19111, 19509, 19845, 21398, 21465, AND 21719)

COUNTIES: El Dorado and Placer

STREAM SYSTEM: Lake Tahoe

Notice is hereby given that Tahoe City Public Utility District (TCPUD) has filed a petition for change, and thirteen (13) amended petitions for change and time extensions for its water right permits listed above with the State Water Resources Control Board (State Water Board), Division of Water Rights (Division). The petitions for change for Permits 13531, 14334, 14337, 14746, and 14572 were originally noticed on December 28, 1979 and were renoticed on January 28, 1980 to include Permit 14331. The petition for change filed under Permit 14931 is a new action. The petitions for extensions of time for Permits 13531, 14334, 14331, 14337, and 14746 were originally filed in 1971 and for Permits 14572 and 14931 in 1976.

Due to disputes, litigation, and uncertainty of the interstate waters of the Lake Tahoe and Truckee River Basins, the State Water Board held all water right proceedings in abeyance and actions on the petitions within the basins were delayed due to the negotiations that resulted in the Truckee River Operating Agreement (TROA). On December 1, 2015, the federal watermaster began implementation of TROA, and the interstate allocations under the 1990 Truckee-Carson-Pyramid Lake Water Rights Settlement Act (Settlement Act) took effect. The diversion, storage, and use of water from the Lake Tahoe and Truckee River Basins under water rights issued by the State Water Board, including the rights issued to TCPUD under the subject water rights, will be conditioned in accordance with the provisions of TROA and the Settlement Act.

The State Water Board is re-noticing the subject water right petitions to ensure that the records reflect these events and to allow interested parties to submit protests on the petitions based on current circumstances.

The following are summaries of each water right associated with the petitions:

TCPUD indicated that all existing Lake Tahoe intake facilities and connections to the distribution system were constructed in the 1970-1980s, and no additional construction is necessary to utilize the five existing points of diversion. TCPUD will, however, be constructing a new West Lake Tahoe Regional Water Treatment Plant (WLTRWP) to treat surface water from its existing Lake Tahoe surface water intakes. TCPUD expects the WLTRWP to serve a large portion of its service area along the west shore of Lake Tahoe.

TCPUD petitions for the following changes: (1) the points of diversion presently covered by the above referenced permits be changed to the five points of diversion in Lake Tahoe representing TCPUD's existing lake intakes and described on Exhibit B – Points of Diversion within the petitions filed with the State Water Board, (2) the purpose of use under Permits 13531, 14331, 14334, 14746, and 14931 be changed to Municipal use, and (3) the place of use under said permits be changed to include all of TCPUD's service area as shown on the petition map filed with the State Water Board. TCPUD's service area is located within all or a portion of the sections of the Public Land Survey System as follows:

Sections 3, 4, 5, 9, 10, 15, 16, and 22, T13N, R17E, MDB&M;
Sections 1, 12, 13, 23, 24, and 25, T14N, R16E, MDB&M;
Sections 7, 8, 16 - 21, and 29 - 33, T14N, R17E, MDB&M;
Sections 2, 3, 10 - 17, 22 - 25, and 36, T15N, R16E, MDB&M;
Sections 4 - 7, and 18, T15N, R17E, MDB&M;
Sections 4, 9, 16, 21, 22, 27, 28, 33, 34, and 36, T16N, R16E, MDB&M;

Notice of Petitions for Change and Extension of Time
Tahoe City Public Utility District

Sections 29 - 33, T16N, R17E, MDB&M; and
Sections 20, 21, 28, 29, and 33, T17N, R16E, MDB&M.

With the petitions for extension of time, TCPUD requests a 25-year extension from the date of the State Water Board's Order approving the petitions to complete the beneficial use of water.
