Subject: Don't divert more water from people, ag

Water board members,

I do not think increasing unimpaired flows on the Stanislaus River is a good idea at all. Our water levels need to be retained as much as possible for the needs of the cities down river and for ag. Our water tables are so low people in the foothills have had wells run dry. Don't divert more water.

Proof has already been presented with proper studies. Leave us the water we need so we don't become the new desert. Invest in cisterns to store rain water, especially in areas that annually need more water. Save it don't waste it!

How hard is it for the useless bureaucrats to get this right. Make jobs, not lose them. History has proven that they will last for hundreds of years! Come on Mr. Governor and all your idiots telling you to do something else that will not work and will only add to the problem! Help us, don't destroy us and our beautiful state!!!!

Thank you.
