**Subject:** Please protect our rivers

Members of the state water board,

The Stanislaus River is important to this area's agriculture and lifestyle. Please do not increase unimpaired flows on it or the other nearby rivers. We live in this great area because of the benefits these rivers bring. Perhaps the southern region of California could develop better ways to conserve its water and build reservoirs as opposed to destroying what we have here.

Thank you.

Lori Thomas  
Modesto
