

Dear Chair Felicia Marus & Board Members

Rivers have been an important part of my life as a place to reflect, relax and discover more about my environment. As you look at the control plan, please consider that at least half of the San Joaquin River natural flow should reach the Delta during the first six months of the year. Flows during the summer & fall should be sufficient to maintain fish & wildlife, water quality & recreational opportunities. Thank you for your consideration. Thank you!
