

Dear Chair Marcus and Board — FM

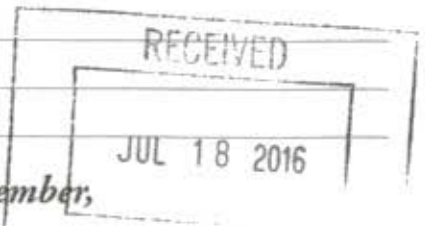

I am a third generation Californian and am now raising my children here in California. I am writing to encourage the board to act to protect California's fish and wildlife for next generation.

In particular, I support implementation of a plan that allows for 60% unimpaired flow between February and June, as determined in the State Water Board's 2010 report on flow criteria. Flows should be sufficient to maintain fish and wildlife, water quality, and recreational opportunities.

Thank you for your work on behalf of Californians.

Best,

Katie Woodworth
