**Subject:** Don't hurt our region by raising flows

Water board,

I am opposed to any increase in unimpaired flows on the Stanislaus River because of the job losses our region will incur, the fallowing of some of the most productive farmland in the country and the depletion of our groundwater supplies. California is in a critical situation due to extensive drought conditions and our agricultural areas have been the hardest hit. Please consider the damage that will be done if you get this wrong.

Thank you.

Annette Smith
