**Subject:** Farmers rely on water to feed the world

Water board,

I am opposed to increasing unimpaired flows on the Stanislaus River. I own and manage 58 irrigated acres of pasture that requires water for my business to survive. The animals that graze on these pastures would not survive on dry lots. I am also terribly concerned about the ag farm community affected by decreased water supplies up and down the entire valley. We feed the world, we NEED water!

Respectfully,

Susan Greene  
Oakdale
