Attorneys for Protestant, City of Antioch

BEFORE THE CALIFORNIA STATE WATER RESOURCES CONTROL BOARD

HEARING IN THE MATTER OF CALIFORNIA DEPARTMENT OF WATER RESOURCES AND UNITED STATES BUREAU OF RECLAMATION REQUEST FOR A CHANGE IN POINT OF DIVERSION FOR CALIFORNIA WATER FIX CITY OF ANTIOCH'S OPPOSITION TO DWR MOTION FOR RE-CONSIDERATION RE: HEARING OFFICERS RULING ON SCOPE OF THE PART 2 HEARING – with particular emphasis with respect to the scope of flow criteria for Part 2

INTRODUCTION

The City of Antioch supports the prior ruling(s) of the State Water Resources Control Board Hearing Officers with respect to the Department of Water Resources ("DWR") motion on the scope of Part 2 of these proceedings. With respect to DWR's present motion for Reconsideration ("DWR Motion"), the City will focus this Opposition on the scope of the Part 2 hearing proceeding addressing "Flow Criteria." This issue was raised by DWR during Antioch's Part 2 case-in-chief and is again raised in DWR's Motion for Reconsideration. DWR alleges that based on the Board's August 31, 2017 and November 8, 2017 Part 2 Rulings that "Flow Criteria" is to be narrowly construed and is limited to Phase 2 impacts on

fish, wildlife, and recreation *only*. DWR's assertion is not correct and contrary to prior rulings by this Board

DWR'S MOTION AS TO SCOPE OF FLOW CRITERIA FOR PART 2

DWR's Motion at p. 4 contends that the scope of flow criteria for the purpose of Part 2 is narrow:

Nor do the requirements of the Delta Reform Act codified in California Water Code section 85086 support this expansion. This was succinctly stated by the Hearing Officers in the August 31, 2017 Ruling on Part 2 Scheduling and Other Procedural Matters. "Part 2 of the hearing will focus on the potential effects of the petition on fish and wildlife and recreational uses ... including consideration of appropriate Delta flow criteria for the Waterfix Project as required by the Sacramento-San Joaquin Delta Reform Act of 2009." (p.12, emphasis added.) The scope and focus of this proceeding is narrow (November 8, 2017 Ruling, p.2), and focuses only on the changes the California WaterFix project may have as compared to a No Action Alternative.

The City of Antioch does not seek to expand the scope beyond what the Board has already ruled on. However, with respect to the scope of flow criteria, Antioch relies on the Board's rulings at the Part 2 Pre-Hearing held on October 19, 2017.

Those pre-trial hearing rulings resulted in three major determinations as to Flow Criteria for Part 2: first, all parties were welcomed to introduce what they believed would be appropriate flow criterion; second, that such flow criteria proposals could address Phase 1 issues either in connection with Phase 2 issues or solely as to Phase 1 issues; and finally, that such a proposal relating to flow criteria could include proposals for permit terms.

PRE-HEARING ON PART 2 - SCOPE OF FLOW CRITERIA

During the October 19, 2017 pre-hearing, Mr. O'Laughlin raised the issue as to which parties should submit proposals on flow criteria during Part 2. The Board encouraged all parties to submit flow criteria proposals (see Transcript of pre-hearing pp. 27-29):

MR. O'LAUGHLIN: Good morning again. Tim 4 O'Laughlin, San Joaquin Tributaries Authority. I have two questions regarding appropriate Delta flow criteria. So, if I'm understanding you correctly, basically every party to the proceeding in regards to their case in chief in Phase 2 should put forward what they believe the appropriate Delta flow criteria should be pursuant to the Water Code for the approval of the Petition; is that correct? CO-HEARING OFFICER DODUC: If you have a proposal to make, we would like to hear it. MR. O'LAUGHLIN: Okay. So, I'm just trying to figure out how this process plays out over time. So everybody makes their appropriate Delta flow criteria proposals. We cross-examine all the various proposals that are being made. And then at some later point in time, what happens? CO-HEARING OFFICER DODUC: The Board will make 22 a decision to include what we determine to be appropriate flow criteria should we approve this Petition.

Having determined that all parties were welcome to submit evidence regarding appropriate flow criteria, the Board then determined that such flow criteria could address Phase 1 impacts (solely or in connection with Phase 2 impacts) as well as propose terms and conditions. (Transcript of pre-hearing pp. 37-38):

MR. SALMON: And my question is, given that

- 9 Delta flow criteria is stated as a Part 2 issue --
- 10 CO-HEARING OFFICER DODUC: Um-hmm.
- 11 MR. SALMON: -- and not a Part 1 issue, can the
- 12 evidence that's introduced on that issue in a Part 2 case

22	The foreg
23	the Part 2 proce
24	
25	preparing and p

13	in chief relate to protecting or responding to concerns
14	that a party has raised in Part 1? Injury to legal user
15	of water, for example.
16	CO-HEARING OFFICER DODUC: Will it also address
17	potential injury well to fisheries and other
18	resources? Or is it specific to just addressing injury
19	to water user?
20	MR. SALMON: Would it be permissible to propose
21	Delta flow criteria for the WaterFix Project and support
22	that with evidence as to why those flow criteria are
23	needed to protect against a Part 1 impact?
24	CO-HEARING OFFICER DODUC: YES.
25	MR. SALMON: Would it be permissible to
1	introduce new evidence regarding those impacts to legal
2	users of water if it directly relates to supporting the
3	proposed Delta criteria?
4	CO-HEARING OFFICER DODUC: Is there a legal
5	concern with that, Miss Heinrich?
6	As you can attest, during the course of this
7	hearing we've been very open to the introduction of
8	potential terms, conditions, criteria, so I at this point
9	don't see an issue with that.

The foregoing is what Antioch understood, and still understands, to be the scope of the Part 2 proceeding with respect to Flow Criteria. It is exactly what Antioch did in preparing and presenting its case-in-chief for Part 2 – by following the Board's clear directives during the pre-hearing for Part 2. And yet, during Antioch's direct testimony of Dr Susan Paulsen, DWR objected attempting to inappropriately narrow testimony on Flow

Criteria in direct contradiction to the directives of the Board during the October 19, 2017 pre-hearing on Part 2.

CONCLUSION

It continues to be Antioch's position that its case-in-chief met all the directives of the Board and was within the scope of flow criteria for Part 2 because: a) it validly established a base line as to what constitutes historic natural flow and water quality at Antioch (including for public trust flows) prior to the projects and major upstream development (no other party has attempted to do this yet in Part 2); b) it validly attempted to provide flow criteria proposals using existing regulatory "tools" such as D-1641¹ and X2 that may be helpful to approximate the historic natural flow (keeping mind that natural conditions likely cannot be ever fully restored); and c) it validly proposed certain permit conditions. ALL of which are within the scope of Part 2 flow criteria as established by the Board at the October 19, 2017 pre-hearing. Both DWR's Motion and their objection to Antioch's case-in-chief seek to have this Board inappropriately narrow the scope of flow criteria for Part 2 in direct contradiction to the Board's prior determinations on this issue.

Dated: MARCH 28, 2018
