EDUCATION

B.S. in Wildlife and Fisheries Biology, U.C. Davis with High Honors, June 1981.

EXPERIENCE

Department of Fish and Game

May 1992 to present - Environmental Specialist IV Supervisory, Environmental Services Division, Sacramento. Supervise the Stream Evaluation and Stream Requirements programs which develop recommendations for instream flows based on the Instream Flow Incremental Methodology, temperature models, and other appropriate techniques. Coordinate statewide review and comment on water rights applications and Federal Energy Regulatory Commission projects. Work with the State Water Resources Control Board, courts, public interest groups, and water users to resolve public trust issues related to fish and wildlife.

February 1989 to May 1992 - Environmental Specialist III, Environmental Services Division, Sacramento. Coordinate review of water rights applications and Federal Energy Regulatory Commission projects.

June 1988 to February 1989 - Fishery Biologist, San Joaquin Salmon Project, Fresno. Conduct studies to determine impacts of water development on chinook salmon stocks of the San Joaquin River system.

March 1985 to June 1988 - Fishery Biologist, White Bass Project, Fresno. Research life history of white bass. Prepare Environmental Impact Report on management and eradication of white bass. Conduct chemical control program in Kaweah River drainage.

1981 to 1985 - Fish and Wildlife Scientific Aid, working for Sacramento National Wildlife Refuge, for Inland Fisheries Region 1 in Redding, and for the Water Pollution Control Lab in Rancho Cordova.

The Peregrine Fund

1983 and 1984 - Hack Site Attendant, Colorado and Idaho.
