Subject: Extinction of fish species

Dear Rich,

First, I'd like to suggest that you change your email name from "waterboards" to something that sounds less like a terrorist tactic. Speaking of which, I'd like to request that you stop terrorizing our endangered Delta fish by:

Reversing your decision to relax the D-1641 March requirements for inflows to San Francisco Bay and ensuring that these flows critical to the continued existence of Delta smelt, winter-run Chinook salmon and other species are actually provided.

Reversing your decision to partly relax the D-1641 limits on export pumping, in order to prevent devastating impacts on the last remaining Delta smelt and winter-run salmon.

Big Ag already sucks up 80% of our state's water. It's time for them to learn to conserve, rather than continually demanding more.

Thank you and best regards,

Judy Irving
