Subject: Water needed in the Central Valley
Importance: High

Dear Mr. Rich Satkowski,

I am really not sure why you think it is acceptable to keep water from the Central Valley where our food is grown and the Chickens, Cattle and other farm animals that provide meat to California live.

Because of your uneducated decision, farmers have had to plow under crops, kill off live stock . . . all due to the lack of water . . . You do not provide the neccesay amount of water needed to just maintain these farms.

Eggs have gone from \$1.98 per dozen to \$4.98 per dozen and milk has become liquid gold. Beef has gone up over \$4.50 per pound . . . All due to the so called water shortage.

It seams to me that if you can sell water to Los Angeles and all of Southern California you could cut their water and give it to the farmers who produce our food.

They do not conserve water in Southern Caliornia -- they waiste it by the hundreds of gallons per household per year.

I know this to be true because I have friends and family who still live in Southern California and they let their hoses run while washing their cars -- gallons upon gallons of drinking water down the drain.

GIVE OUR FARMERS WATER!!!!!!!
