**Subject:** Fresh Water for Fish

Water Board:

I live in Berkeley; I want to protect the fish in San Francisco Bay.  
We shouldn't allow the water needs of CA agriculture to force the extinction of the delta smelt. The Water Board should not have eliminated freshwater flow protections for the smelt and other species. Please restore the freshwater flow requirements (in Board order D-1641) for March and reject any new petitions seeking suspension of environmental protections for freshwater flows in March and April.
