Subject: Please approve the OID/SSJID Proposal for water flow on Stanislaus River

Dear Members of the State Water Quality Control Board:

We are writing to urge you to support the tentative agreement recently proposed by the Oakdale and South San Joaquin Water Districts regarding water flow on the Stanislaus River. We believe the proposal is a balanced approach to meeting the competing needs of fish/wildlife, agriculture, power generation, residential and commercial supply and recreation. We understand and support the environmental objectives of the Water Board and believe this approach, while perhaps not ideal, is a good compromise to protecting both the ecology and the economy of the region in this time of severe drought.

Thank you for taking the time to consider our input on this difficult issue.

Best Regards,

Willard and Karen Oweung
Homeowners, Calaveras County
