<sup>1</sup> Policy statements are explained in item #5a of the attached "Information Concerning Participation".

## SUBJECT OF HEARING

The purpose of this hearing is to receive any relevant new information that should be considered by the State Water Resources Control Board (SWRCB) prior to adoption of a decision. Information regarding the following subjects is solicited.

- The condition of the fishery and other public trust resources of the lower Yuba River.
- The effects that the operations of New Bullards Bar Reservoir, Englebright Lake, and other diversions from the lower Yuba River downstream of Englebright Lake have on these resources.
- Appropriate revisions to water right permits and licenses, and changes in water diversion structures and practices needed to protect the fishery and other public trust resources.

## BACKGROUND

On February 23, 1988, the SWRCB received a complaint regarding fishery protection and water right issues on the lower Yuba River. The complaint was filed by a coalition of fishery groups referred to as the United Group<sup>2</sup>. The complainants' main contention is that the instream flow requirements in the Yuba County Water Agency's (YCWA) water right permits and the existing fish screening facilities do not provide an adequate level of protection for fishery resources in the lower Yuba River.

On May 8, 1991, the California Department of Fish and Game (DFG) requested that the SWRCB revise existing streamflow and temperature requirements on the lower Yuba River, in accordance with the recommendations set forth in the "Lower Yuba River Fisheries Management Plan" (DFG Plan) proposed by DFG. The SWRCB subsequently held a 14-day water right hearing beginning on February 10, 1992, to consider the long-term fishery protection recommendations in the DFG Plan and to address other issues raised by the United Group's complaint.

The SWRCB hearing included the receipt of testimony and other evidence from 15 parties and presentation of non-evidentiary policy statements regarding the issues under consideration. The evidentiary hearing concluded on June 8, 1992. Following submittal of legal briefs, the hearing record was closed on August 25, 1992.

On February 10, 1999, the Division distributed to all parties copies of the staff analysis and a draft decision relating to the issues addressed in the 1992 water right hearing. The draft decision would:

- Establish flow, temperature and ramping requirements that would be applied primarily to the water rights held by YCWA.
- Require YCWA and other local entities to develop workplans to describe measures to be taken to improve fish screens or to otherwise reduce fish losses at the major points of diversion from the lower Yuba River.

---

<sup>2</sup> The United Group includes the following organizations: California Sportfishing Protection Alliance, United Anglers of California, Northern California Council Federation of Fly-Fishers, Fly Fishers of Davis, and E.C. Powell Fly-fishers

- Require measures to be taken by specified parties<sup>3</sup> that divert water from the lower Yuba River to comply with applicable legal requirements.

Due to the length of time since the close of the SWRCB's 1992 hearing, the SWRCB scheduled a hearing to begin on September 8, 1999 to receive relevant new information that was not available at the time of the 1992 hearing.

On July 1, 1999, the SWRCB issued a Notice of Public Hearing, which described the hearing procedure and the Key Issues to be explored during the hearing. [Note: this notice and the July 1, 1999, hearing notice can be found at the Division of Water Rights' Hearing Unit web-site: [www.waterrights.ca.gov/hearings](http://www.waterrights.ca.gov/hearings)]

On July 16, 1999, the SWRCB received a letter from DFG and YCWA which requested postponement of the scheduled hearing. DFG's and YCWA's joint request was made to allow the parties additional time to reach a proposed settlement agreement regarding interim flows and studies to be conducted on the lower Yuba River. The DFG and YCWA request stated that, by mid-November, they intended to present a recommendation for interim flows and studies together with a request that the SWRCB proceed with certain other aspects of the SWRCB's draft decision dated April 28, 1999. In response to DFG's and YCWA's request for postponement, the SWRCB issued on July 21, 1999, a Notice of Hearing Cancellation. [Note: the cancellation notice can be found at the Division of Water Rights' Hearing Unit web-site: [www.waterrights.ca.gov/hearings](http://www.waterrights.ca.gov/hearings)]

On November 15, 1999, DFG and YCWA advised the SWRCB that the parties were unable to reach a proposed settlement agreement regarding interim flows and studies to be conducted for the lower Yuba River. Consequently, the SWRCB has rescheduled the supplemental hearing that was previously scheduled for September, 1999.

### KEY ISSUES

1. What relevant new information is available regarding factors that influence population trends of the following species of anadromous fish present in the lower Yuba River: American shad, steelhead trout, spring-run chinook salmon, late-fall chinook salmon, and fall-run chinook salmon?
2. What relevant new information is available regarding stream flow and water temperature requirements for the protection of fish in the lower Yuba River? Is new information available to support different stream flow and water temperature requirements during below normal, dry, and critically dry water years?
3. What relevant new information is available regarding the water diversion facilities, fish screens, fish ladders and fish losses at: (1) the Browns Valley Pumpline Diversion facility, (2) the South Yuba/Brophy Water District South Canal, (3) the North Canal which serves Hallwood, Cordua and Ramirez Districts, (4) the YG Development Co., and (5) the Daguerre Point Diversion Dam.

---

<sup>3</sup> The specified parties are: YCWA, Browns Valley Irrigation District, Brophy Water District, Cordua Irrigation District, South Yuba Water District, Rameriz Water District, and YG Development Company and Western Aggregates, Inc.

4. What additional studies may be needed to further refine stream flow and water temperature requirements for the protection of fishery resources in the lower Yuba River?
5. What relevant new information is available regarding existing and projected water supply requirements for irrigation, municipal use and waterfowl habitat within YCWA's service area?
6. What relevant new information is available regarding water conservation measures and conjunctive use measures that could be implemented within the YCWA service area?
7. What relevant new information is available regarding the effects of proposed and recommended fishery protection measures on the use of water for non-fishery purposes (i.e., (a) impacts to existing and projected water supply, power generation supply, and the local economy; and (b) impacts on recreation, wildlife, riparian vegetation and waterfowl habitat)?
8. What relevant new information is available regarding the water rights and diversions and uses of water by parties diverting water from the lower Yuba River?
9. What relevant new information related to the following subjects is available regarding the historic operation of New Bullards Bar Reservoir during the period 1969 to the present?
  - Total monthly inflow of water.
  - Total monthly losses of water (i.e., evaporation and seepage).
  - Total monthly storage releases of water -- what are the components of monthly storage releases (i.e., power generation, in-basin uses, out-of-basin transfers, fishery use).
  - End-of-month storage volumes, end-of-month staff gage elevations, end-of-month surface areas.
  - Current staff gage elevation/surface area/reservoir capacity values for the reservoir.
