

## PERMIT TERM 44

Title: Outlet Pipe - Dam Complete (Noncritical Watershed)

When Used: For noncritical watersheds where an onstream reservoir of more than 10 acre-feet has been constructed without an outlet pipe. Staff may modify the language of this term to suit the particular situation.

Term: Permittee, when required by the State Water Resources Control Board, shall install and maintain an outlet pipe of adequate capacity in the dam as near as practicable to the bottom of the natural stream channel, or provide other means satisfactory to the Board, in order that water entering the reservoir which is not authorized for appropriation under this permit can be released. Permittee shall submit plans and specifications of the outlet pipe or alternative facility to the Chief of the Division of Water Rights for approval within six months of the date upon which the Board issues notice that an outlet is required. Permittee shall furnish evidence which substantiates that the outlet pipe or alternative facility has been installed in the dam. Evidence shall include photographs showing completed works or certification by a registered Civil or Agricultural Engineer.
